The chart displays the price trends for three types of billet markets from April 2025 to June 2026. The y-axis represents the price in US dollars (\$/t), ranging from 380 to 530. The x-axis shows the timeline with monthly markers. Three data series are plotted: CIS Billet Export Offers (blue line), Iranian Billet Export Prices (light blue line), and SE Asia Billet Import Offers (red line). The CIS and Iranian prices show a general upward trend, while the SE Asia prices show a more volatile pattern with a significant peak in late 2025. Annotations indicate periods of market assessment withholds due to war tensions, US-Iran war situation, and civil unrest.

India: BigMint's billet index holds steady on modest buying support

05 Jun 2026

BigMint's billet index in Raipur remained unchanged day-on-day at INR 38,800/t exw on 5 May 2026, as moderate buying activity in the semi-finished steel segment and need-based procurement in finished steel helped maintain stable market sentiment.

The market remained range-bound throughout the session, witnessing only minor fluctuations before closing steady. While positive cues from neighbouring markets provided some support to sentiment, limited support in finished steel demand continued to restrict any recovery in billet prices.

Market participants noted that procurement activity remained largely requirement-driven, with buyers avoiding large-volume bookings amid uncertainty over downstream demand. As a result, spot prices remained stable despite intermittent movements in offers during the day.

Sponge iron prices soften slightly

Sponge iron prices in the Raipur cluster eased marginally by INR 50/t d-o-d, weighed down by limited buying interest and lower bids from billet manufacturers. Softening raw material prices were due to cautious procurement approach prevailing across the market.

The conversion spread from sponge iron (PDRI) to billets for the standalone furnaces in the Raipur cluster was recorded at INR

14,400/t.

Rationale

This index is derived based on transactions, offers, bids, and indicative price data sets. Transactions are considered T1 and given a weightage of 50%, whereas other data sets are considered as T2 and given a weightage of the balance 50%.

Transactions (T1) - Three trades at INR 38,800/t were recorded during the 10:30 am to 5:30 pm BigMint trading window and considered for final price calculation as T1 inputs. The average of these transactions was INR 38,800/t, which was given a 50% weightage in the final price calculation.

Other price indicators - bids/offers/indicatives (T2) - Fourteen offers were reported in the trading window and considered as T2 inputs. The average price of these fourteen was INR 38,842/t and given a 50% weightage in the final price calculation.

The final price of billets was INR 38,821/t exw-Raipur, rounded off to INR 38,800/t exw.

From BigMint Team - While it would be our earnest endeavour, at BigMint, to bring about transparent and unbiased price index reporting, we would request all our readers and subscribers for their feedback and if they could participate in the reporting of more transactions.
