China weekly: steel prices show mix trend amid seasonal headwinds and raw material support

Jun 13, 2026 14:28

Rising raw material costs continue supporting steel prices. Soft downstream buying weighs on China's steel market.China's steel prices show mixed trend in the week ended 12 June 2026. Chinese HRC prices dropped whereas rebar prices stable with the market facing a seasonal slowdown. On the raw materials front, prices of iron ore and coke prices stable, though billet prices increased w-o-w.China's finished steel exports reached 10.341 million

Jindal (India) commissions new colour coating line, completes ₹1,500-cr Bengal expansion

The image shows a complex industrial facility at night or in low light. A massive horizontal roller is the central focus, with a wide, bright blue sheet of metal being processed. Above the roller, a white sign with black lettering reads "COLOUR COATING LINE". The machinery is supported by a network of steel beams and yellow safety railings. In the background, other parts of the factory are visible, including more structural elements and possibly another section of the production line.

India: BigMint's billet index declines further amid weak demand

12 Jun 2026

BigMint's billet index declined marginally by INR 50/t d-o-d to INR 38,750/t exw-Raipur on 12 June 2026, as buying interest in the semi-finished steel market remained subdued despite largely stable offers from mills.

Market participants noted that enquiries were limited and mostly focused on securing lower prices, prompting some mills to reduce offers to attract bookings. Weak demand in the finished steel segment, coupled with negative sentiment from neighbouring markets, continued to weigh on overall trade activity. Although sellers attempted to maintain spot prices at current levels, several market sources indicated that rising operating costs are compressing margins.

Finished steel market shows mixed trend

In Raipur, finished long steel prices reflected mixed market sentiment amid weak end-user demand. Rebar prices remained stable, while wire rod prices declined by INR 200/t d-o-d due to sluggish retail offtake and slow market movement.

Sponge iron prices edge lower

Sponge iron prices in the Raipur cluster fell by INR 200/t d-o-d as suppliers reduced offers to stimulate buying interest. Market participants reported limited bookings during the day despite the availability of lower-priced material.

The conversion spread from sponge iron (PDRI) to billets for standalone induction furnaces in

Raipur was assessed at INR 14,600/t.

Rationale

This index is derived based on transactions, offers, bids, and indicative price data sets. Transactions are considered T1 and given a weightage of 50%, whereas other data sets are considered as T2 and given a weightage of the balance 50%.

Transactions (T1) - Three trades at INR 38,700-38,800/t were recorded during the 10:30 am to 5:30 pm BigMint trading window and considered for final price calculation as T1 inputs. The average of these transactions was INR 38,747/t, which was given a 50% weightage in the final price calculation.

Other price indicators - bids/offers/indicatives (T2) - Sixteen offers were reported in the trading window and considered as T2 inputs. The average price of these sixteen was INR 38,775/t and given a 50% weightage in the final price calculation.

The final price of billets was INR 38,761/t exw-Raipur, rounded off to INR 38,750/t exw.

From BigMint Team - While it would be our earnest endeavour, at BigMint, to bring about transparent and unbiased price index reporting, we would request all our readers and subscribers for their feedback and if they could participate in the reporting of more transactions.
